### **DETAILED ACTION**

1. Applicants' response filed on 1/25/2011 amended independent claim 9. Applicants' amendments in light of their arguments are persuasive and, therefore, the 35 USC 103 rejection over Vojacek in view of Wygant from the office action mailed on 10/25/2010 is withdrawn. For the reasons stated below, claims 9-13 and 22-34 are in allowable condition.

### **Examiners Amendment**

2. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

A) At the beginning of line 1 on page 1 of the specification:

Please add the phrase, "This application is a 371 of PCT/JP04/14735, filed October 6<sup>th</sup>, 2004.

B) Please change the status identifier of claim 9 from "(Previously Presented)" to ("Currently Amended").

***Allowable Subject Matter***

3. The following is an examiner's statement of reasons for allowance:

As evidenced by the prior art references of record, it is well known in the art to use hydrocarbon compounds as base oils in traction drive compositions. However, the hydrocarbon base oils of the instant application are unique bridged alicyclic base oils that are derived from bicycle[2.2.1] heptane rings. Derivatives of bicycle[2.2.1] heptane ring base oils are known in the art and are used as base oils in traction drive fluid composition, but the compounds represented by formulas (a)-(f) are not present in the art as lubricant base oil derivatives. Hydrogenated longifolene products have been in use for a long time but not as base oils for lubricant compositions.

The compounds disclosed in Vojacek do not read on instant claim 9 because the two ring of the structures are bonded at 2 carbon atoms which is the case only in formulas (d) and (f). The compounds represented by formulas (d) and (f) have cyclohexane rings attached to the norbornene ring as opposed to a cyclopentane as disclosed in Vojacek.

Jasra et al., US Patent No. 7,132,582 (hereinafter referred to as Jasra) discloses a production method for isolongifolenes which are used in the perfume industry and furthermore have not been hydrogenated as recited in the instant claims.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably

accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
